## Objective

A passionate and detail-oriented software developer with a strong foundation in frontend and backend technologies. Skilled in building responsive web applications, integrating APIs, and managing databases. Known for quick learning, adaptability, and delivering clean, efficient code. Strong teamwork and communication abilities with a focus on continuous improvement. Career Objective To contribute my technical skills and creativity to a dynamic team where I can develop impactful software solutions, grow professionally, and support the organization's goals through innovative and efficient development practices.

---

## Experience

- Tecno Cyber** September 2023 - December 2023  
Tech Support Assistant  
As a tech support assistant in a cyber café, I helped customers with printing, browsing, emails, and troubleshooting computer or internet issues. I maintained the equipment, ensure smooth network operation, and provide guidance on basic software use and online services.
- Phoenix Chemist** October 2024 - December 2024  
Remote Data Entry Clerk  
As a data entry clerk, I accurately input, update, and manage data in computer systems or databases, ensuring completeness and consistency. I verified information, maintain confidentiality, and supported administrative tasks to keep records organized and easily accessible.
- Anonymous Tech Solutions** February 2025 - Present  
Software engineer

At Anonymous Tech Solutions, I work as a Software Engineer, contributing to the design, development, and deployment of scalable web applications and digital solutions for clients across various industries. My responsibilities include:

- Building and maintaining front-end interfaces using modern frameworks such as React.
- Developing and integrating backend services using Node.js and Express.
- Collaborating with cross-functional teams to gather requirements and deliver tailored solutions.
- Implementing secure authentication systems and RESTful APIs.
- Managing databases (MongoDB/PostgreSQL) and optimizing data flow.
- Conducting code reviews, testing, and debugging to ensure performance and reliability.
- Participating in agile development cycles and continuous integration workflows.

This role has sharpened my skills in full-stack development, problem-solving, and project delivery under real-world constraints.

- Omosoft Technologies** September 2025 - present  
Sales Executive  
- Promoted and sold the company's software solutions to clients in various sectors, focusing on product value and client needs.  
- Identified potential customers, scheduled product demos, and provided after-sales support.  
- Collaborated with the tech team to understand product features and translate them into client benefits.  
- Maintained strong client relationships, resulting in increased referrals and repeat business.  
- Met and exceeded monthly sales targets and contributed to revenue growth.

---

## Education

- Matili Technical Training Institute** 2025  
Diploma in computer studies
- St Mary's Sosio Girls High School** 2020  
High School diploma  
C+ 50

---

## Skills

- Problem Solving
- Database Management
- Data Analysis
- Graphics Design

- Software Development
- Networking
- Web Development
- UI/UX Design
- Sales management

---

## Projects

- **Web based attendance system (in PHP and MySql)**

Developed a user-friendly web application for tracking and managing attendance records efficiently. The system allows administrators to add users (students/employees), mark daily attendance, and generate attendance reports. Key features include:

- Secure login system for admin and users
- Attendance marking (Present/Absent/Late)
- Date-wise and user-wise report generation
- MySQL database for reliable data storage
- Clean UI built with HTML, CSS, and PHP
- Validation and error handling for data integrity

This project showcases backend logic handling, database management, and real-world application of CRUD operations

- **To do list application**

developed a user friendly application for adding tasks to be done. A person can add tasks and set reminders for tasks created by HTML, CSS and JavaScript, react

- **Personal Portfolio**

personal portfolio highlighting my strengths and achievements and more about me

---

## Languages

- Programming Languages & Technologies - \*Frontend:\* HTML, CSS, JavaScript, React, TypeScript, Bootstrap, Tailwind CSS - \*Backend:\* PHP, Node.js, C#, Python - \*Database:\* MySQL, MongoDB - \*General Programming:\* C++, Python, C# - \*Others:\* Git & GitHub, REST APIs, JSON, AJAX
